

# What is the Pipeline Program?

(PART 1)

## PRO SCOUTING REPORTS

Written by Merf Trout, a well-respected 10-year veteran of professional football and former 5.5-Star Athlete on Rivals, Scout Trout Pro Scouting Reports are reputable and trusted throughout the college football community. Coach Trout's expertise and experience allow him to identify the true talent and potential of a recruit that often goes unrecognized by mainstream scouting media, which is why you will seldom see him regurgitate the same dull descriptions used in CFB recruiting and the NFL draft every year.

Through a detailed expert analysis of the technique and skill shown in a recruit's film, with additional upside projected from their combine-based athleticism, academic success, and intangibles, Scout Trout Pro-Scouting Reports unfailingly raise a recruit's value as a college football player in the eyes of coaches and recruiters (just ask them yourself with our mass recruiting contact list of over 3,100 e-mails).

## INDIVIDUAL SPOTLIGHT E-MAIL BLASTS

Unlike "recruiting agencies" that serve merely as a platform for recruits to reach coaches, Scout Trout delivers the talent featured in our recruiting database directly into the inboxes of every recruiting decision-maker from every scholarship college football program in the country. Each Scout Trout individual Spotlight E-mail Blast is opened/clicked by an average of 200 head coaches, position coordinators, recruiting directors, and other influential football staff members (many of whom revisit the content of our e-mails anywhere from 8 to 32 times).

College football recruiting in the information age can be an overwhelming landscape to navigate, as Twitter and recruiting websites are too easily fabricated by parents or the prospects themselves.

For this reason, we provide all the objective information, coaches and recruiters look for when evaluating prospective student-athletes including their contact info, year of graduation, high school, combine/stats, honors, awards, achievements, and most importantly their Scout Trout rank/S.T.E.P. Rating.

## PICTURE EDITS

If you're wondering what could possibly be the practical purpose of a flash picture edit in furthering the recruiting process, I recommend you web or image search every top nationally ranked recruit with 10+ D1 offers. Chances are, you will find a myriad of colorful and creative edits that portray their subject as a highly coveted divine prince of college football. Using advanced SEO settings, Scout Trout Picture Edits reach the top of Google searches, where everyone searching your name or even just "elite college football prospect" can see your name next to your stats and combine numbers.
